

## Water Blocking Tapes of Fiber Optic & Power Cables

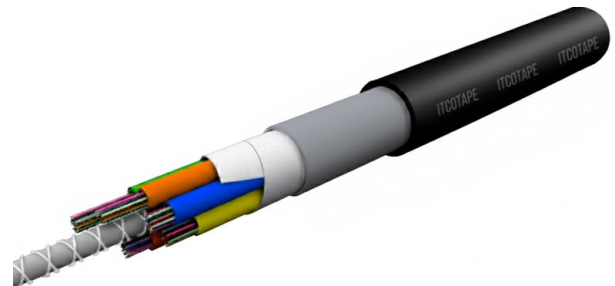

ITCOTAPE offers advanced **Water Blocking Tapes** as a reliable solution for **Telecom & Power Cables**. Manufactured using **state-of-the-art scatter coating technology**, our non-woven fabric is coated with high-performance **Super Absorbent Polymers (SAP)**. The SAP is strategically laminated to deliver **consistent, excellent water blocking performance** by minimizing penetration. This design provides a **low thickness** profile with high swell height, resulting in a **cost-effective solution** that reduces overall cable diameter.

ITCOTAPE is available in various thickness and swelling requirements to meet the most stringent cable designs.

**Over 25 years**

of serving Cable makers Worldwide

## Key Features of ITCOTAPE

- ✓ Fast Swelling Speed
- ✓ Good Gel Stability
- ✓ Easy Processability
- ✓ High Tensile Strength
- ✓ Good Long-Term Stability
- ✓ Long Spool Lengths
